1. Claims 23-24 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Claim 23 indicates that the opening 252 is adapted to be used as an outlet. However, the specification at page 31, lines 1-5 indicates that opening 252 is adapted to be used as an inlet while the specification at page 30, lines 18-22, in contrast, indicates that the opening 252 is to be used as an outlet. This contradiction between portions of the specification would require undue experimentation of one of ordinary skill in the art.

2. Claims 17-22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 17 is indefinite because "the control device" on line 6 lacks antecedent basis within the claim. In addition, the phrase "attached the secondary extruder" at the end of the claim appears to be grammatically incorrect. Clarification is required.

3. Applicant's arguments filed October 29, 2003 have been fully considered but they are not persuasive. Applicant's arguments are considered to be moot by the examiner based on the revised ground of rejection introduced in this Office action.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Allan Kuhns whose telephone number is (571) 272-1202. The examiner can normally be reached on Monday to Thursday from 7:00 to 5:30.
